

Turkish Inventions Exhibits in Iena Fair

The 59th International Trade Fair "Ideas - Inventions - Innovations", IENA 2007, one of the most prestigious fair of the world, in which more than 650 inventions and innovative products from 40 country will be exhibited, will be held from 1st to 4th November 2007 in Nuremberg, Germany.

The fair has been organized since 1950 and it has served as a springboard to the global market for a large number of inventions, such as safety belt, wheeled trunk.

Turkish Patent Institute (TPI), participated to the IENA Fair last year for the first time, so that, our three national inventors could present their inventions to the visitors and they deserved many medals and awards. As in previous year, TPI will be participating to the IENA Fair with three national inventors this year.

By means of this activity, TPI will provide a good opportunity for the national inventors both in promoting their new products and presenting them to international markets. This will also provide an opportunity for the national inventors to meet with national and foreign entrepreneurs.

The following inventions will be presented at the TPI stand;

1. Murat Nural's invention: "Vertically Rising Ladder" (Finalist of the NTV Invention Contest)
2. Ersin Dođan's invention: "High Power Laser" (Regional first place of the Kanal D Invention Contest)
3. Gürçan Gürses's invention: "A Method for Manufacturing a Ceramic Filter" (Finalist of TÜBİTAK Invention Contest among Secondary Education Students)
